

WiFi Printing at

SANTA MONICA PUBLIC

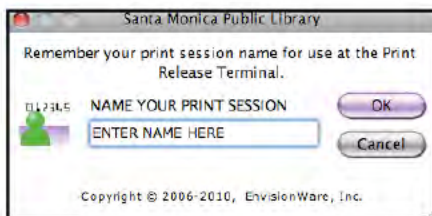

LIBRARY

MAC (Intel only)

- To use WiFi printing, go to: http://smpl.org/WiFi_and_Ethernet.aspx
- Select the MacOS printer driver to download the file **LPT One Mobile Prince Client**
- Open app by clicking on the icon found in the Downloads folder.
- You may receive a warning screen against downloading the app. Click Open -

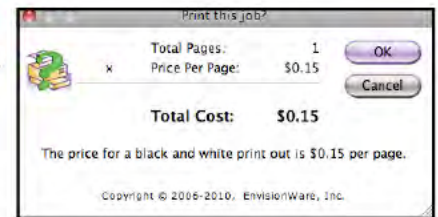

- The **LPT One Mobile Print Client** is now located on the Launchpad bar. Double-click to load the printer into System Preferences > Print & Fax
- The printer driver, **WiFi Black & White Printers**, is now installed and located in the launchpad (program bar) at the bottom or side of the screen.

- The first time each session a job is submitted it must be named.
- Before printing, the number of pages and the cost of the job display.

Click OK to start printing

- At the WiFi printer, click on the icon in the upper left hand corner, and enter the name of the job when prompted.
- Print jobs can be picked up on either floor of the Main Library and at all library branches.

Main Library Locations

First Floor: Copy Center

Second floor: North of the Reference Desk

— Jobs remain in the active queue for 2 hours. —

To Uninstall click on the **LPT One Mobile Print Client** icon on the Launchpad to activate the app. Go to the menu bar pull down menu and Select: **Quit LPT One Mobile Print Client** or use Command-Q.
