Seed packet bundles contain at least 3 packets of seeds appropriate for **warm weather** growing. These seeds should generally be started between January and March. See reverse for basic seed starting information and tips.

Bundles are pre-selected and pre-packaged. Due to limited stock and staffing, we are unable to accommodate requests for specific varieties.

**Seed bundles available:**
(Limit 2 per household. While supplies last.)

- **Corn-ucopia**
- **Cantaloupes, Watermelons, Honeydew**
- **Cucumbers and Eggplants**
- **Herbs** – Could include basil, cilantro, fennel, culinary sage, and/or summer savory.
- **Oh, My Gourd!** – Mix of summer and winter squash
- **Peppers** – Choose **sweet** or **hot** peppers.
- **Tomato Lovers** - Choose from 3 bundles:
  - **Big Tomatoes**
  - **Cherry Tomatoes**
  - **Paste Tomatoes**
- **Flower Power** – Sunflower, zinnia, sweet peas, and more.
- **Bonus Bundle!** – Random assortment of warm weather growing herbs and vegetables.

---

**Basic Growing Instructions**

**When to Start Seeds:** Start warm weather crops indoors 4 to 6 weeks before the last frost date. For Los Angeles County, start seeds indoors from January to March.

**Thin seedlings** to the strongest plant when they have developed their second set of true leaves.

**Transplant seedlings** to containers or in-ground when they are at least 4-6 inches tall, and when the soil or nighttime temperatures reach 45 degrees Fahrenheit.

**How Many Seeds to Sow:** For most of the seeds listed below, sow 2-3 seeds per cell/cup.
For flower and herb seeds, sow more liberally.

**Watering:** Water young seedlings to keep soil moist, but not wet.
Water large seedlings when soil is dry 1-2 inches below surface, or if leaves start to wilt.

**Feeding:** Most seedlings may benefit from a light to very light feeding after they develop their second set of true leaves.

---

**Cantaloupes, Melons** – Sow seeds 1/2” deep.

**Corn** – Sow seeds 1” to 1.5” deep, spaced 2-4 inches apart in rows.

**Gourds (Squash, Pumpkin)** – Sow seeds 1/2” to 1” deep.

**Herbs (in general)** – Sow seeds 1/8” inch deep.

*Coriander (Cilantro)* – Sow seeds 1/4” deep.
Optional: Before sowing, gently crush seed husk and separate the 2 seeds in each husk.

**Eggplants, Peppers, and Tomatoes** – Sow seeds 1/4” deep.

**Flower** – **Sunflower** – Sow 1” to 2” deep, spacing seeds about 6” apart.

**Flower** – **Zinnia** – Sow seeds 1/8” to 1/4” deep.
